POSTGRADUATE TRAINING

Professional retraining and advanced training of higher medical and pharmaceutical educational institutions graduates are carried out at the faculty of Internship and Postgraduate Education, where specialists have the opportunity to become interns and study at various postgraduate courses. Particular attention is paid to the training of highly qualified staff in residency programs. More than 5000 doctors and pharmacists are trained at the faculty annually.

Postgraduate education is carried out by more than 250 highly qualified teachers. Numerous clinical departments implementing relevant educational programs are concentrated in large medical centers with highly specialized clinical facilities possessing great diagnostic and therapeutic opportunities using modern high-tech equipment and advanced innovative technologies.

TRAINING OF SPECIALISTS FOR DIFFERENT COUNTRIES

The first foreign citizens were enrolled as early as in 1958. All in all, the Donetsk National Medical University has trained over 2536 specialists from 90 countries as well as 62 Candidates of Medical Sciences (PhD Medicine), 501 clinical interns (residents), 117 probationers.

CURATIVE WORK

Nowadays 95 Doctors of Sciences and 396 PhDs working at 56 University clinical departments consult annually more than 300,000 patients, perform more than 35,000 surgical interventions, do the most difficult surgeries and diagnostic studies, go out in counselling teams of Republic Centre of Emergency Medical Care and Catastrophes Medicine to towns and districts of Donetsk People's Republic.

The University has two university clinics: multi-field educational - scientific-curative complex «The University Clinic» and «Scientific Research Institute for the Reproductive Health of Children, Adolescents and Youngsters» developing and implementing new methods of diagnostics, treatment and prevention of various diseases, including endemic pathology.

UNIVERSITY CLINIC

University medicine as an integral component of training and research provides the competitiveness of classical medical universities and is a fundamental requirement for ensuring the clinical adequacy of higher medical education.

The «University Clinic» is a scientific and practical basis for the introduction of contemporary technology and scientific research of clinical departments. On the basis of the «University Clinic» the scientific - practical seminars and conferences are conducted enabling doctors in all specialties to study the modern approaches to diagnostics and treatment of various diseases, master the new medical technology and constantly improve their professional level.

High staff qualification of the «University Clinic» is well-known among the patients and accumulates research studies and creates the perfect academic environment.

EDUCATIONAL AND TEACHING TECHNIQUES

PRACTICAL SKILLS CENTER

SCIENTIFIC RESEARCH

DNMU is the only medical university owing Scientific Research Institute, multi-field educational - scientific-curative complex «The University Clinic», «The Central Research Laboratory». All the clinics are equipped with modern facilities using exclusive techniques and computer programs designed for examining and treatment of patients.

The university has a unique system of training scientific and pedagogical staff through the institutes of undergraduate and post-graduate studies.

The DNMU has 6 Specialized Councils to acquire scientific degrees in 16 specialties. 7 specialized journals are published. Over the last 5 years 131 degrees have been awarded: 33 degrees of Doctor of Sciences and 98 PhD degrees have been awarded.

Academic relations have been established within the framework of scientific cooperation, primarily with leading medical research institutions all over the world.

INFORMATION SUPPORT OF EDUCATIONAL PROCESS

Library is a modern information center of optimization of medical education. 600 thousands of documents comprise its fund.

The site of the library <http://portal.dnmu.ru/library> provides the network and remote access to the data base: e-catalogue, e-library, fund of digitized documents.

The following service is provided: user's account, preordering of literature, electronic delivery of documents, virtual inquiry service.

The library is created for the convenient and fast access of users to all the types of information resources. WI-FI zones are provided.

The students can get access to the on-line journals, e-library system 'Student's tutor', etc.

EDUCATIONAL AND TEACHING TECHNIQUES

A higher professional level and competitiveness of the staff are provided due to the unique system of programmable learning outcomes management in the sphere of training technologies. Its implementation at the university is based on special approaches to the organization of the educational process, providing students with all the universal and professional competencies they need for future medical practice.

There is a practical training center at the university equipped with modern simulators to master professional practical skills by medical students and interns.

In addition, students acquire practical skills at 49 clinical bases of the university.

Providing a high level of training requires the development of high-quality teaching materials. Every year university teachers create relevant textbooks and study guides, numerous methodological guidelines and recommendations and training programs. The university has created the electronic resource «Informational and educational environment» – a single secure corporate system for extracurricular independent training of students.

STUDENTS RESEARCH WORK

At all departments of DNMU students have the opportunity to be engaged in a research work at «N.D.Dovgyalo Students' Scientific Society». The work of students is supervised by the leading scientists, the founders of worldwide known schools of therapists, oncologists, surgeons, physiologists, pathophysiologists, pharmacologists.

STUDENTS' CLUB

About 15 sections of amateur circles are functioning constantly at the Students' club, including the pop-jazz orchestra «Medicus band», the orchestra of folk instruments, choreographic and vocal groups of the faculties, humor club and others. Various cultural events are held: «Freshman debut», «Days of faculties», «Literary lounges», «Day of music», «Miss of DNMU», «Graffiti», «Literary evenings», «Student ball», «Song karaoke contest», «Student cuisine».

Newspaper «Student pulse» has been publishing and the students' channel «Med-TV» has been promoting.

STUDENT CAMPUS

SPORTS AT THE UNIVERSITY

Sports is a great concern of the authorities. The university teams take part in annual competitions in football, basketball, streetball, aerobics others.

There is a wide range of sport and leisure activities available which students can participate in either at the competition level or just for fun. Our sportsmen participated in the Olympic Games in Sidney and Athens, for 14 years they have been enlisted into the Students National Team at Worldwide and National Students Games.
